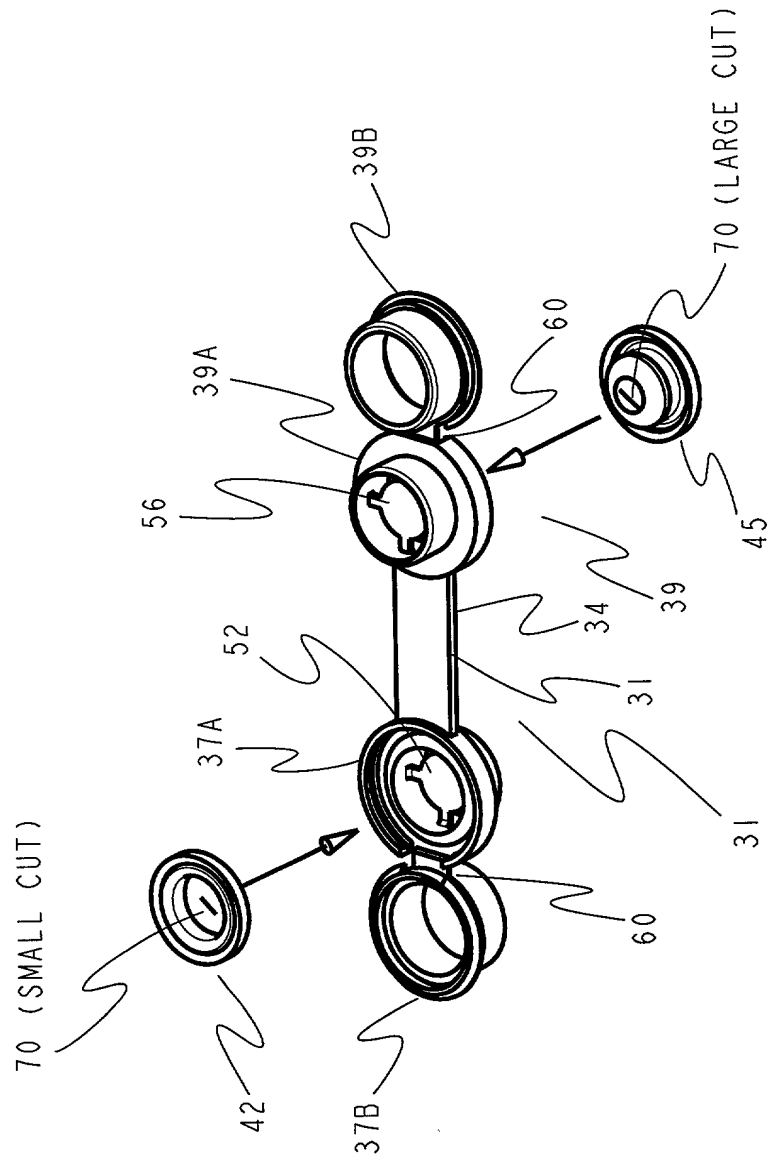

FIGURE 3

FIG. 4 is a perspective view of the valve holder assembly in a disassembled state, showing the valve holder 10, the valve 20, and the valve cap 30. The valve holder 10 is shown with the valve 20 inserted into it. The valve cap 30 is shown with an arrow pointing to it, indicating its position relative to the valve holder 10.

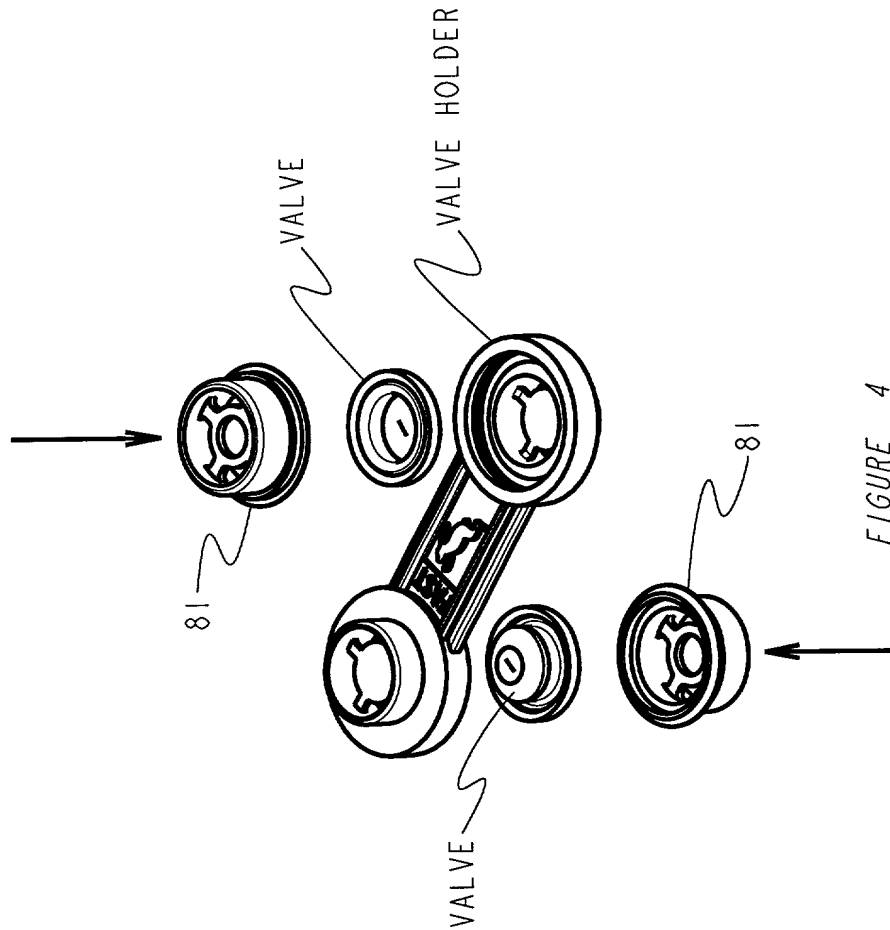

FIGURE 4

FIG. 5(A) is a perspective view of a container 30 with a lid 31. The lid 31 is shown in an open position, revealing a plurality of openings 32 in the lid. A dashed line 33 indicates the lid 31 in a closed position. A dashed line 34 indicates the lid 31 in a partially open position. A dashed line 35 indicates the lid 31 in a fully open position. A dashed line 36 indicates the lid 31 in a fully closed position.

FIG. 8(A) is a perspective view of the device 30 in a closed position. The device 30 includes a handle 37 and a body 39. The handle 37 is connected to the body 39 by a hinge 56. The body 39 includes a port 58 and a seal 52. The device 30 is shown in a closed position, where the handle 37 is rotated to the right, causing the seal 52 to engage the port 58.

FIGURE 12

FIG. 13 is a cross-sectional view of the device 100, showing the internal structure of the device 100. The device 100 includes a housing 110, a base 120, and a top 130. The housing 110 is formed by a front wall 111, a side wall 112, and a back wall 113. The base 120 is formed by a front wall 121, a side wall 122, and a back wall 123. The top 130 is formed by a front wall 131, a side wall 132, and a back wall 133. The device 100 is shown in a cross-sectional view, with the internal structure of the device 100 being visible. The device 100 is shown in a cross-sectional view, with the internal structure of the device 100 being visible.
